Sovereign AI Governed Industrial Workbench — Verifiable Deliverable

Task Title	V-204 Equipment Integrity Evaluation
Task ID	task-c3f32666
Operational Goal	Evaluate mechanical seal wear against plant safety limits
Execution Status	COMPLETED (Empirically Qualified & Governed)

1. Executive Summary

Goal: Evaluate mechanical seal wear against plant safety limits

2. Technical Findings

- **[HIGH]** Equipment V-204 seal wear measured at 0.18mm, exceeding 0.10mm limit by +0.08mm (+80%).
Sources: v204_scanned_inspection.pdf:Page 1

3. Governed Decisions & Authority

- **Decision:** Mandatory replacement of mechanical seal cartridge before re-pressurization
Rationale: Exceeds allowable tolerance per SOP-PV-001 Section 4.2

4. Governance & Integrity Notice

This deliverable is generated under Sovereign AI qualification governance and cryptographic provenance tracking. All assertions are derived from local model inference bounded by task-scoped capability passports and verifiable knowledge grounding.
